

BENEFITS OF The Terahertz Wand

- 1. Eliminate unhealthy cells.** Terahertz frequency energy resonates with our normal cells. All abnormal or mutated cells will be absorbed and eliminated.
- 2. Activate inert cells.** Terahertz frequency will absorb and activate cells with moderate temperature, thus eliminating dormant cells.
- 3. Increase self-healing.** Terahertz frequency reduces and strengthens DNA and organic molecules and resonates with our cells thus enhances self-repair.
- 4. Clear meridian and lymph.** Terahertz frequency unblock meridians, stimulate acupuncture points, purify the blood and increase metabolism.
- 5. Improve micro-circulation.** Terahertz frequency dilate blood vessels, reduce blood flow resistance and viscosity.
- 6. Regulate glands.** Terahertz frequency regulate endocrine glands and protect our organs.
- 7. Removes body humidity.** Terahertz frequency clears unhealthy body moisture and balances body's immunity system.
- 8. Circulation.** Terahertz frequency clear blood impurities, cleanses inner blood circulation and removes clogs, and softens blood vessels and lumps.
- 9. Neutralize pollutants.** Terahertz frequency neutralizes pollutants because of negative ions. It provides positive effects on health to act on our capacity to absorb and utilized oxygen.

NOT RECOMMENDED FOR:

1. Patients with bleeding disorders (with a history of bleeding within one year, bleeding tendency or in the bleeding period) and severe infections are prohibited.
2. Menstrual period (can be used for those with low menstrual flow and dysmenorrhea) and contraindications during pregnancy.

FEATURE PROJECT

Children cold, fever, cough
 (safe and effective)

The Physiotherapy Device per household
 is equivalent to hiring a private doctor
 and is super cost-effective.

Smart health instrument.
 One-key operation,
 patented technology,
 multiple certifications.
 Safe and comfortable
 to carry and convenient
 for the whole family.

RESTORE your precious health with The Physiotherapy Device

Quantum health technology makes health
 maintenance easier. Drugs can treat tissue
 damage, but they cannot restore cell
 damage. The terahertz wave therapy
 instrument can bring a lot of quantum to the
 cell. Wake up the body's absorption

capacity and relax the muscles. Help open up the
 internal circulation and filter clutter. Terahertz wave refers
 to a kind of lightwave with a very short wavelength
 electromagnetic wave with frequency in the range of
 0.003-0.3THz, the energy penetrates 20-30cm into the
 human body, and the thermal effect generated has strong
 penetrating power and high efficiency.

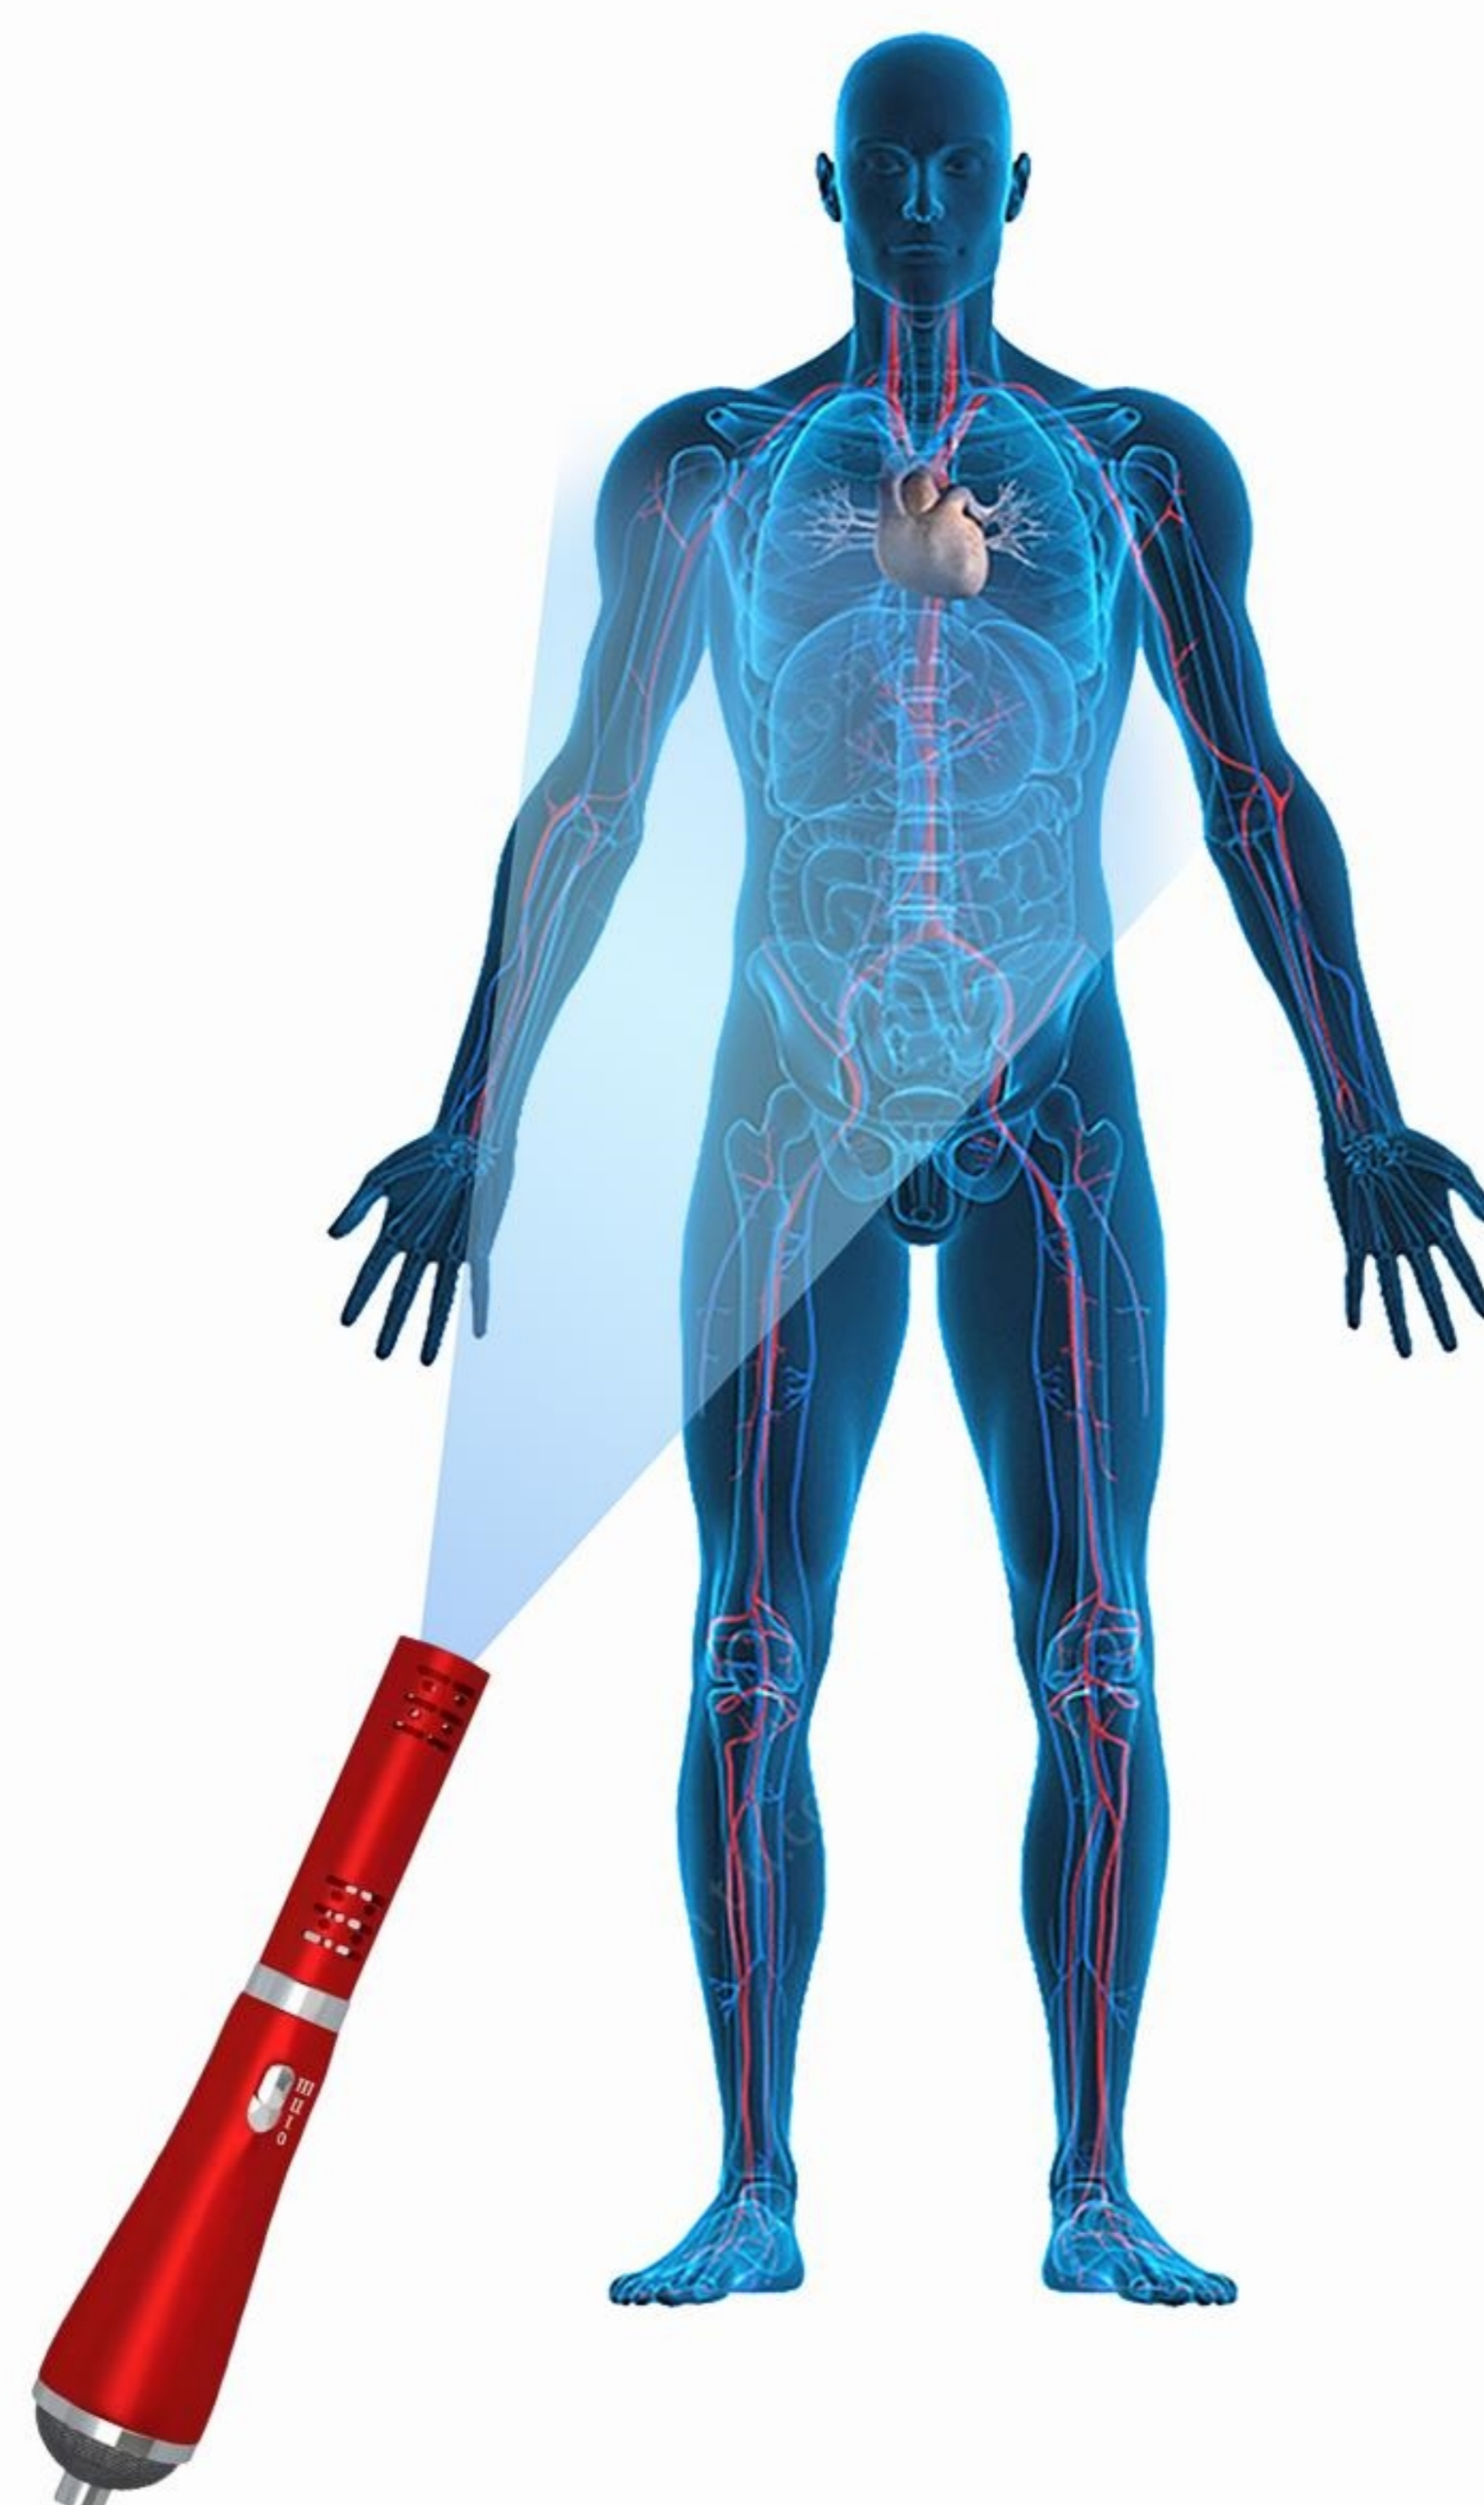

Quantum implantation technology is
 to implant quantum energy into the
 product through "sound, light,
 electricity, and magnetism and
 through quantum energy wave
 frequency." The material can carry an additional layer of
 energy frequency based on the original frequency
 and the implanted product will occur. Changes in the
 order of molecular arrangement, and the implanted
 product can carry a quantum high-frequency vibration
 energy field.

The effect of terahertz waves on the human body brings a
 lot of negative ions to the deep cells of the human body.
 Solve the state of excessive accumulation of positive ions
 in the device rest area to activate the "charge" of
 cells, further repair damaged cells, and improve the
 Body's self-healing power.

Treat cold and dampness,
 dredge the meridians, clear
 blockages, activate blood
 circulation, relieve swelling
 and pain, remove toxins and
 clear away heat.

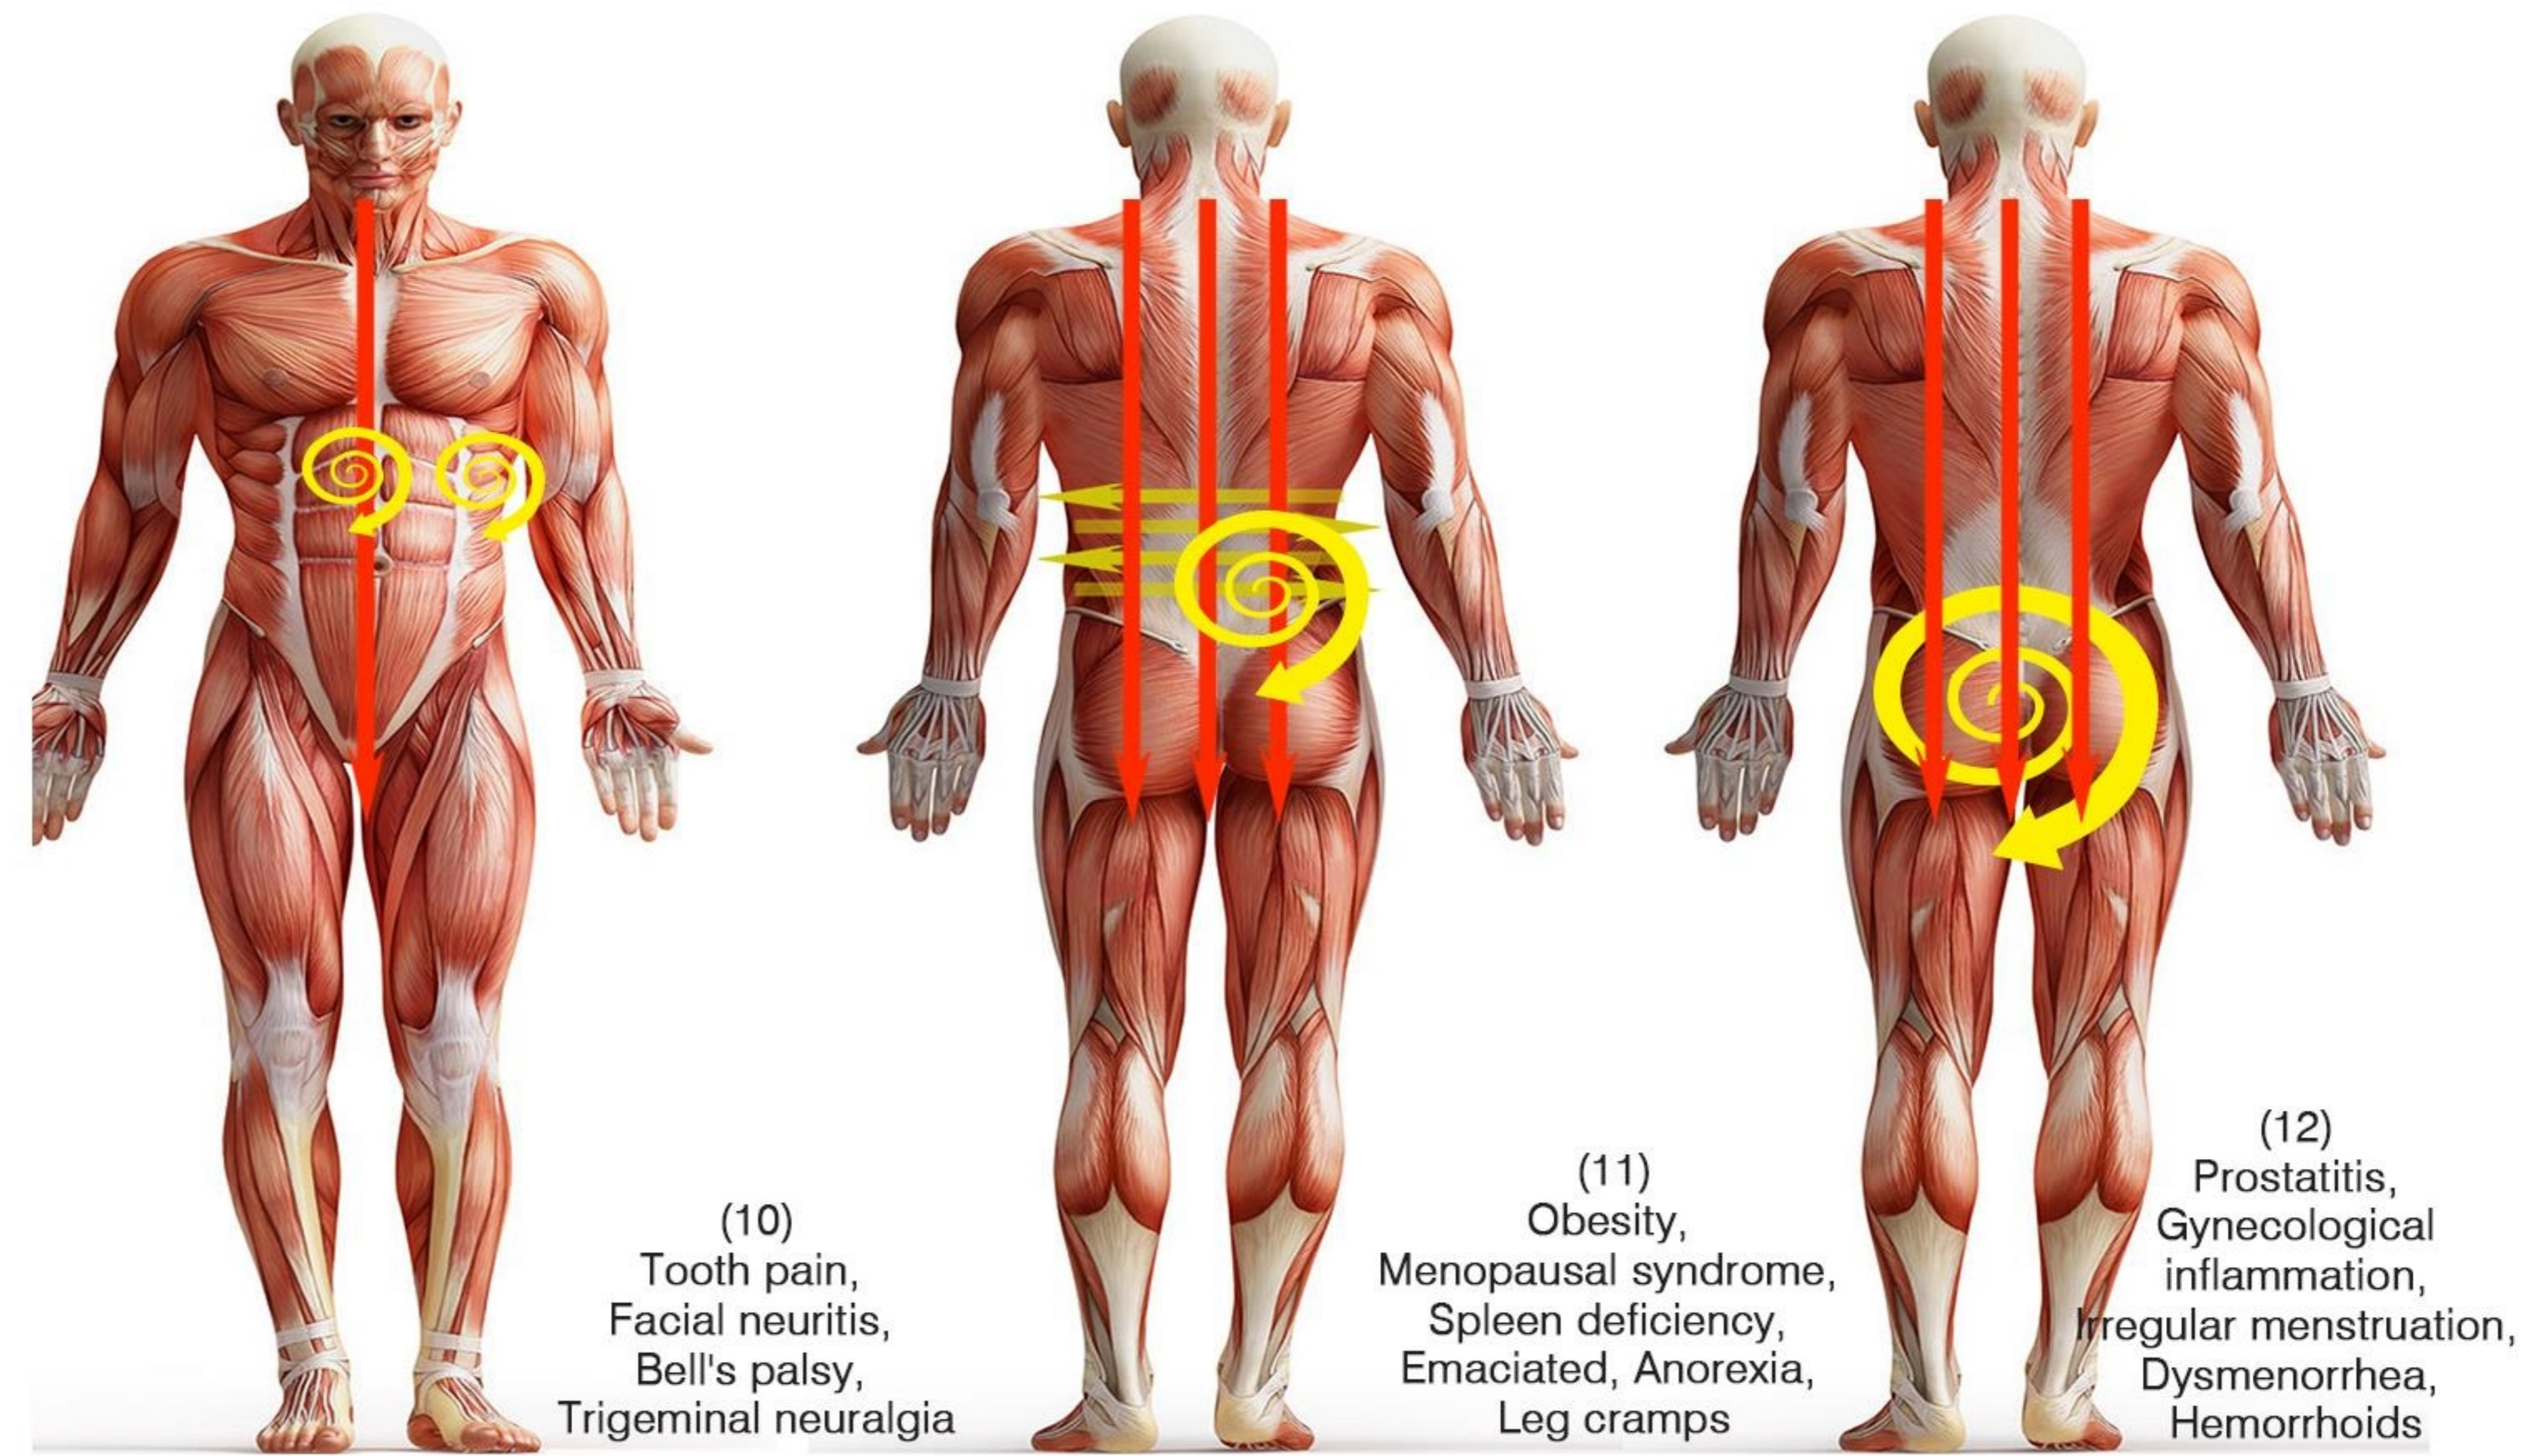

Adjust the balance of yin and
 yang (negative and positive)
 of the human body, relieve
 fatigue and enhance physical
 health, so as to strengthen
 the body, removing
 pathogenic factors and
 preventing diseases.
 Therefore, many diseases can
 be treated by cell
 hyperthermia. For example,
 middle-aged people,
 which belong to rheumatism
 and enters the bones.

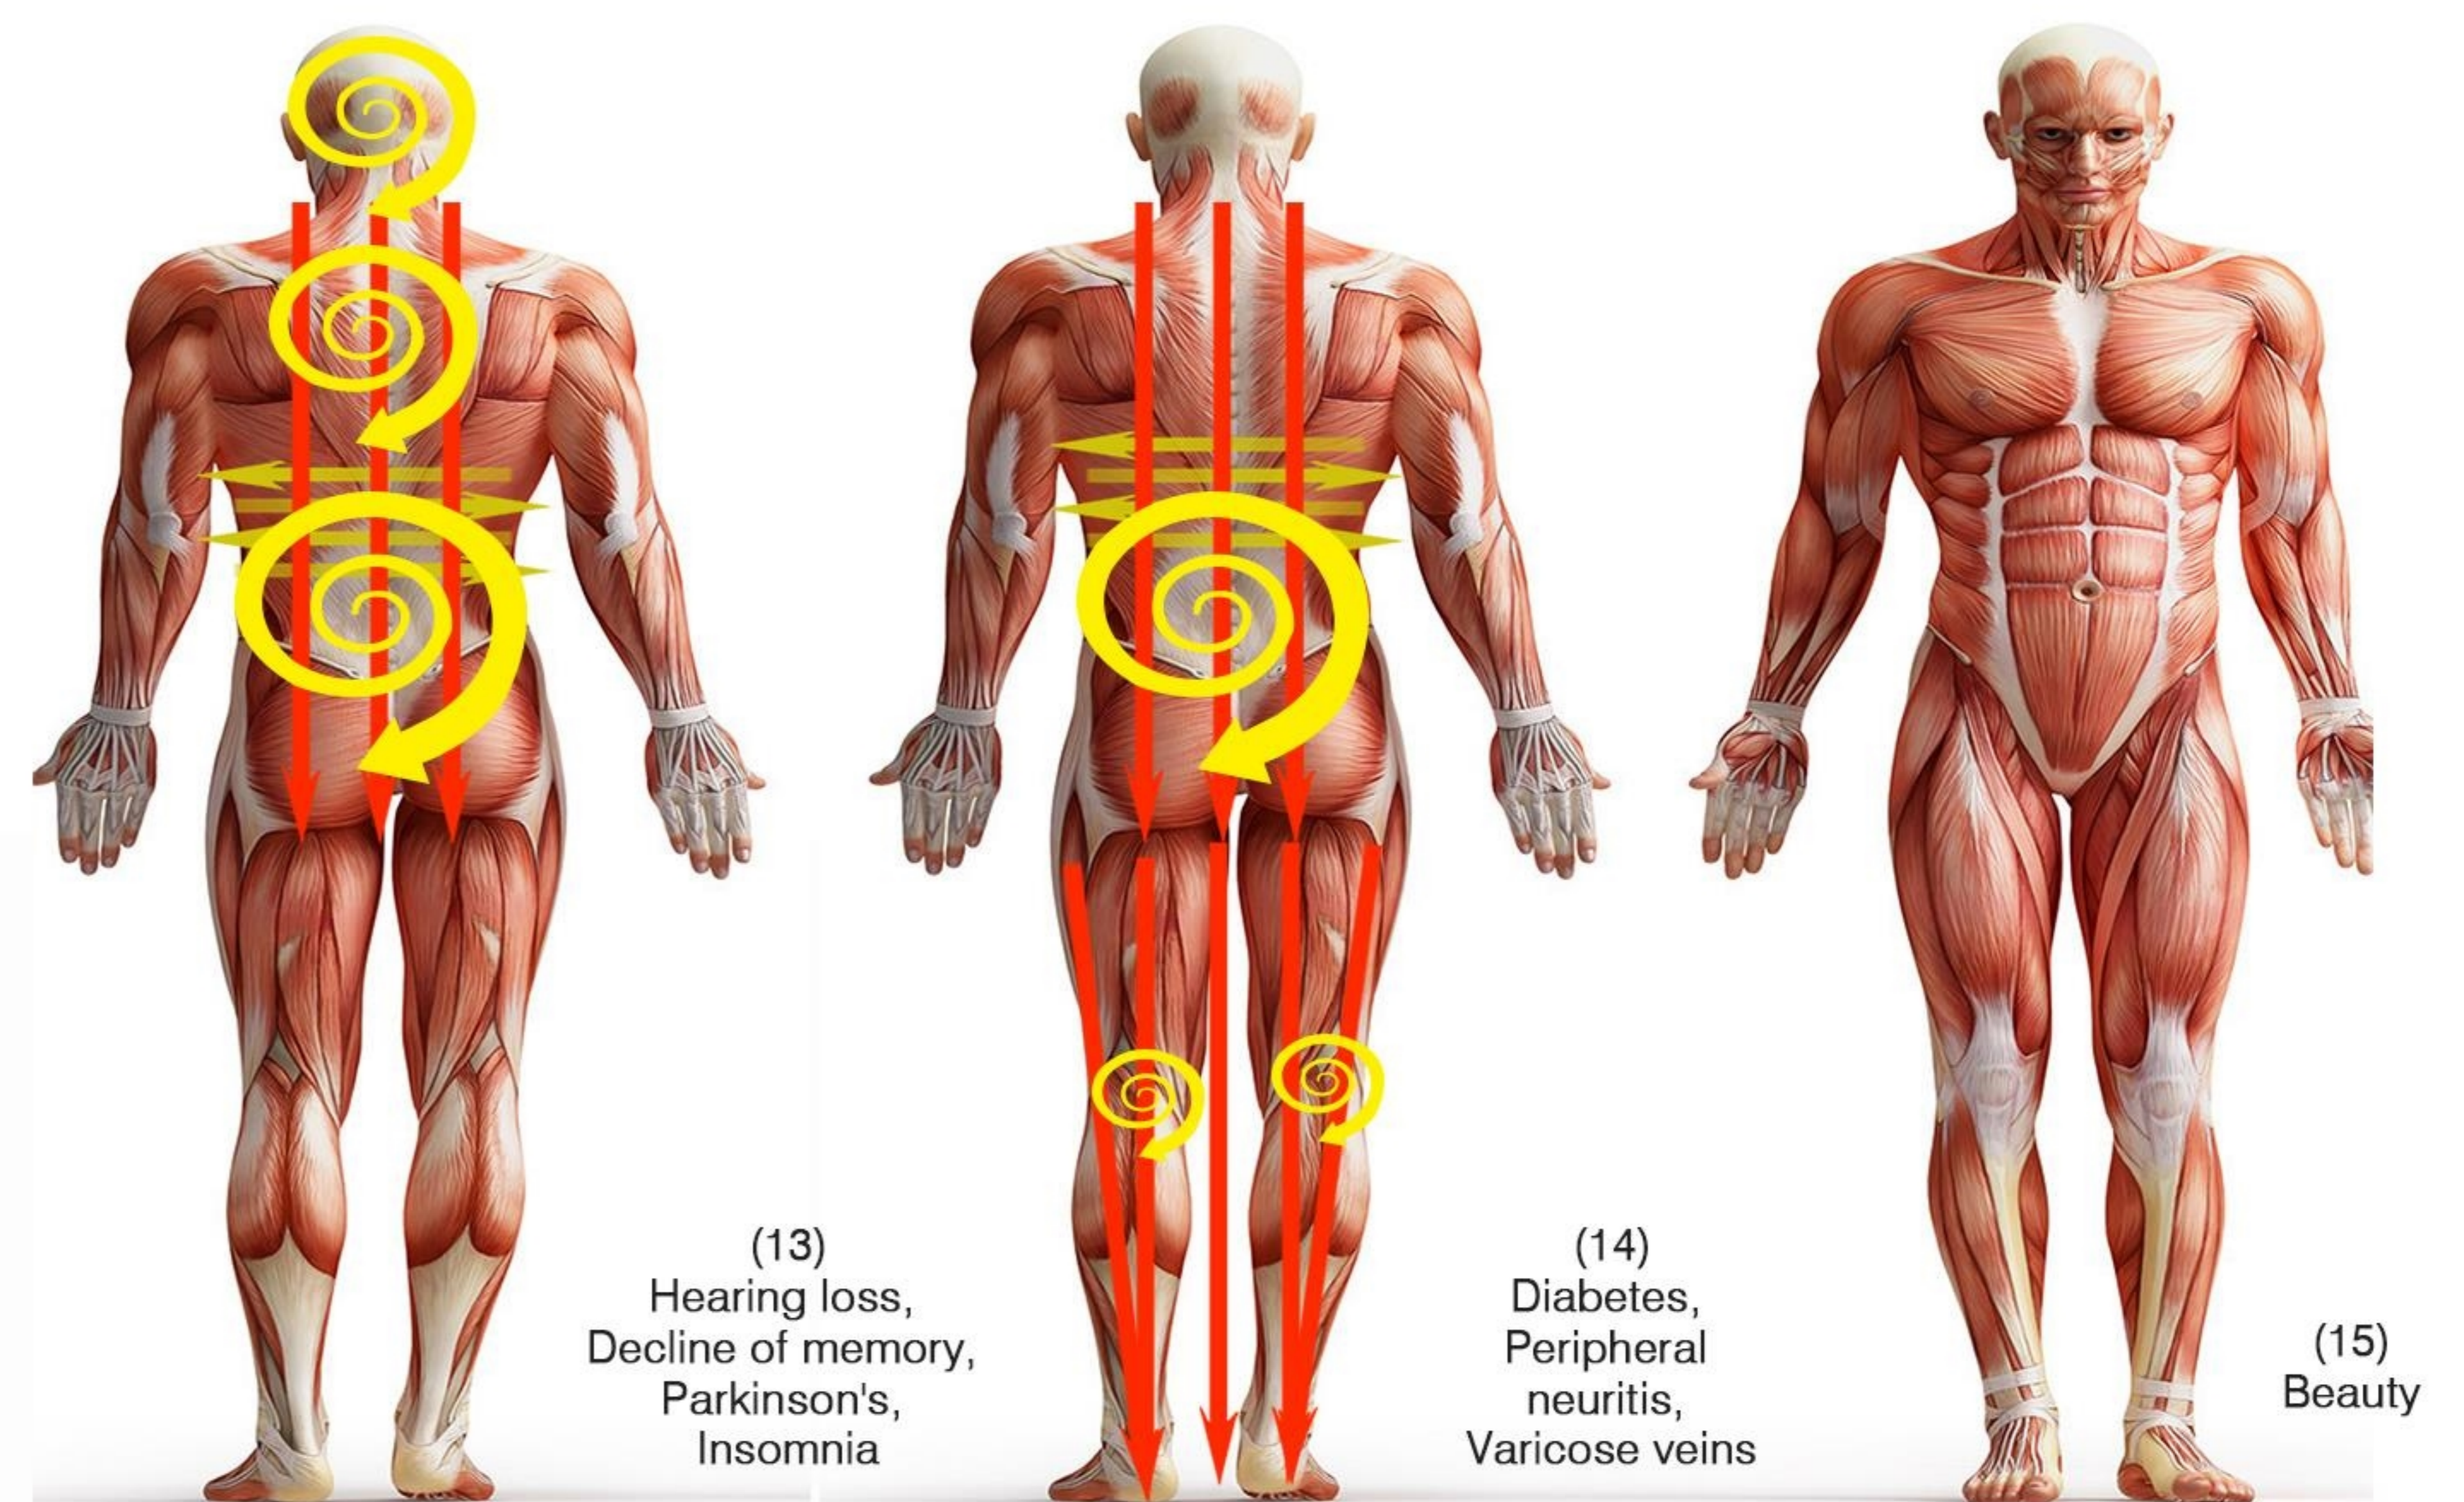

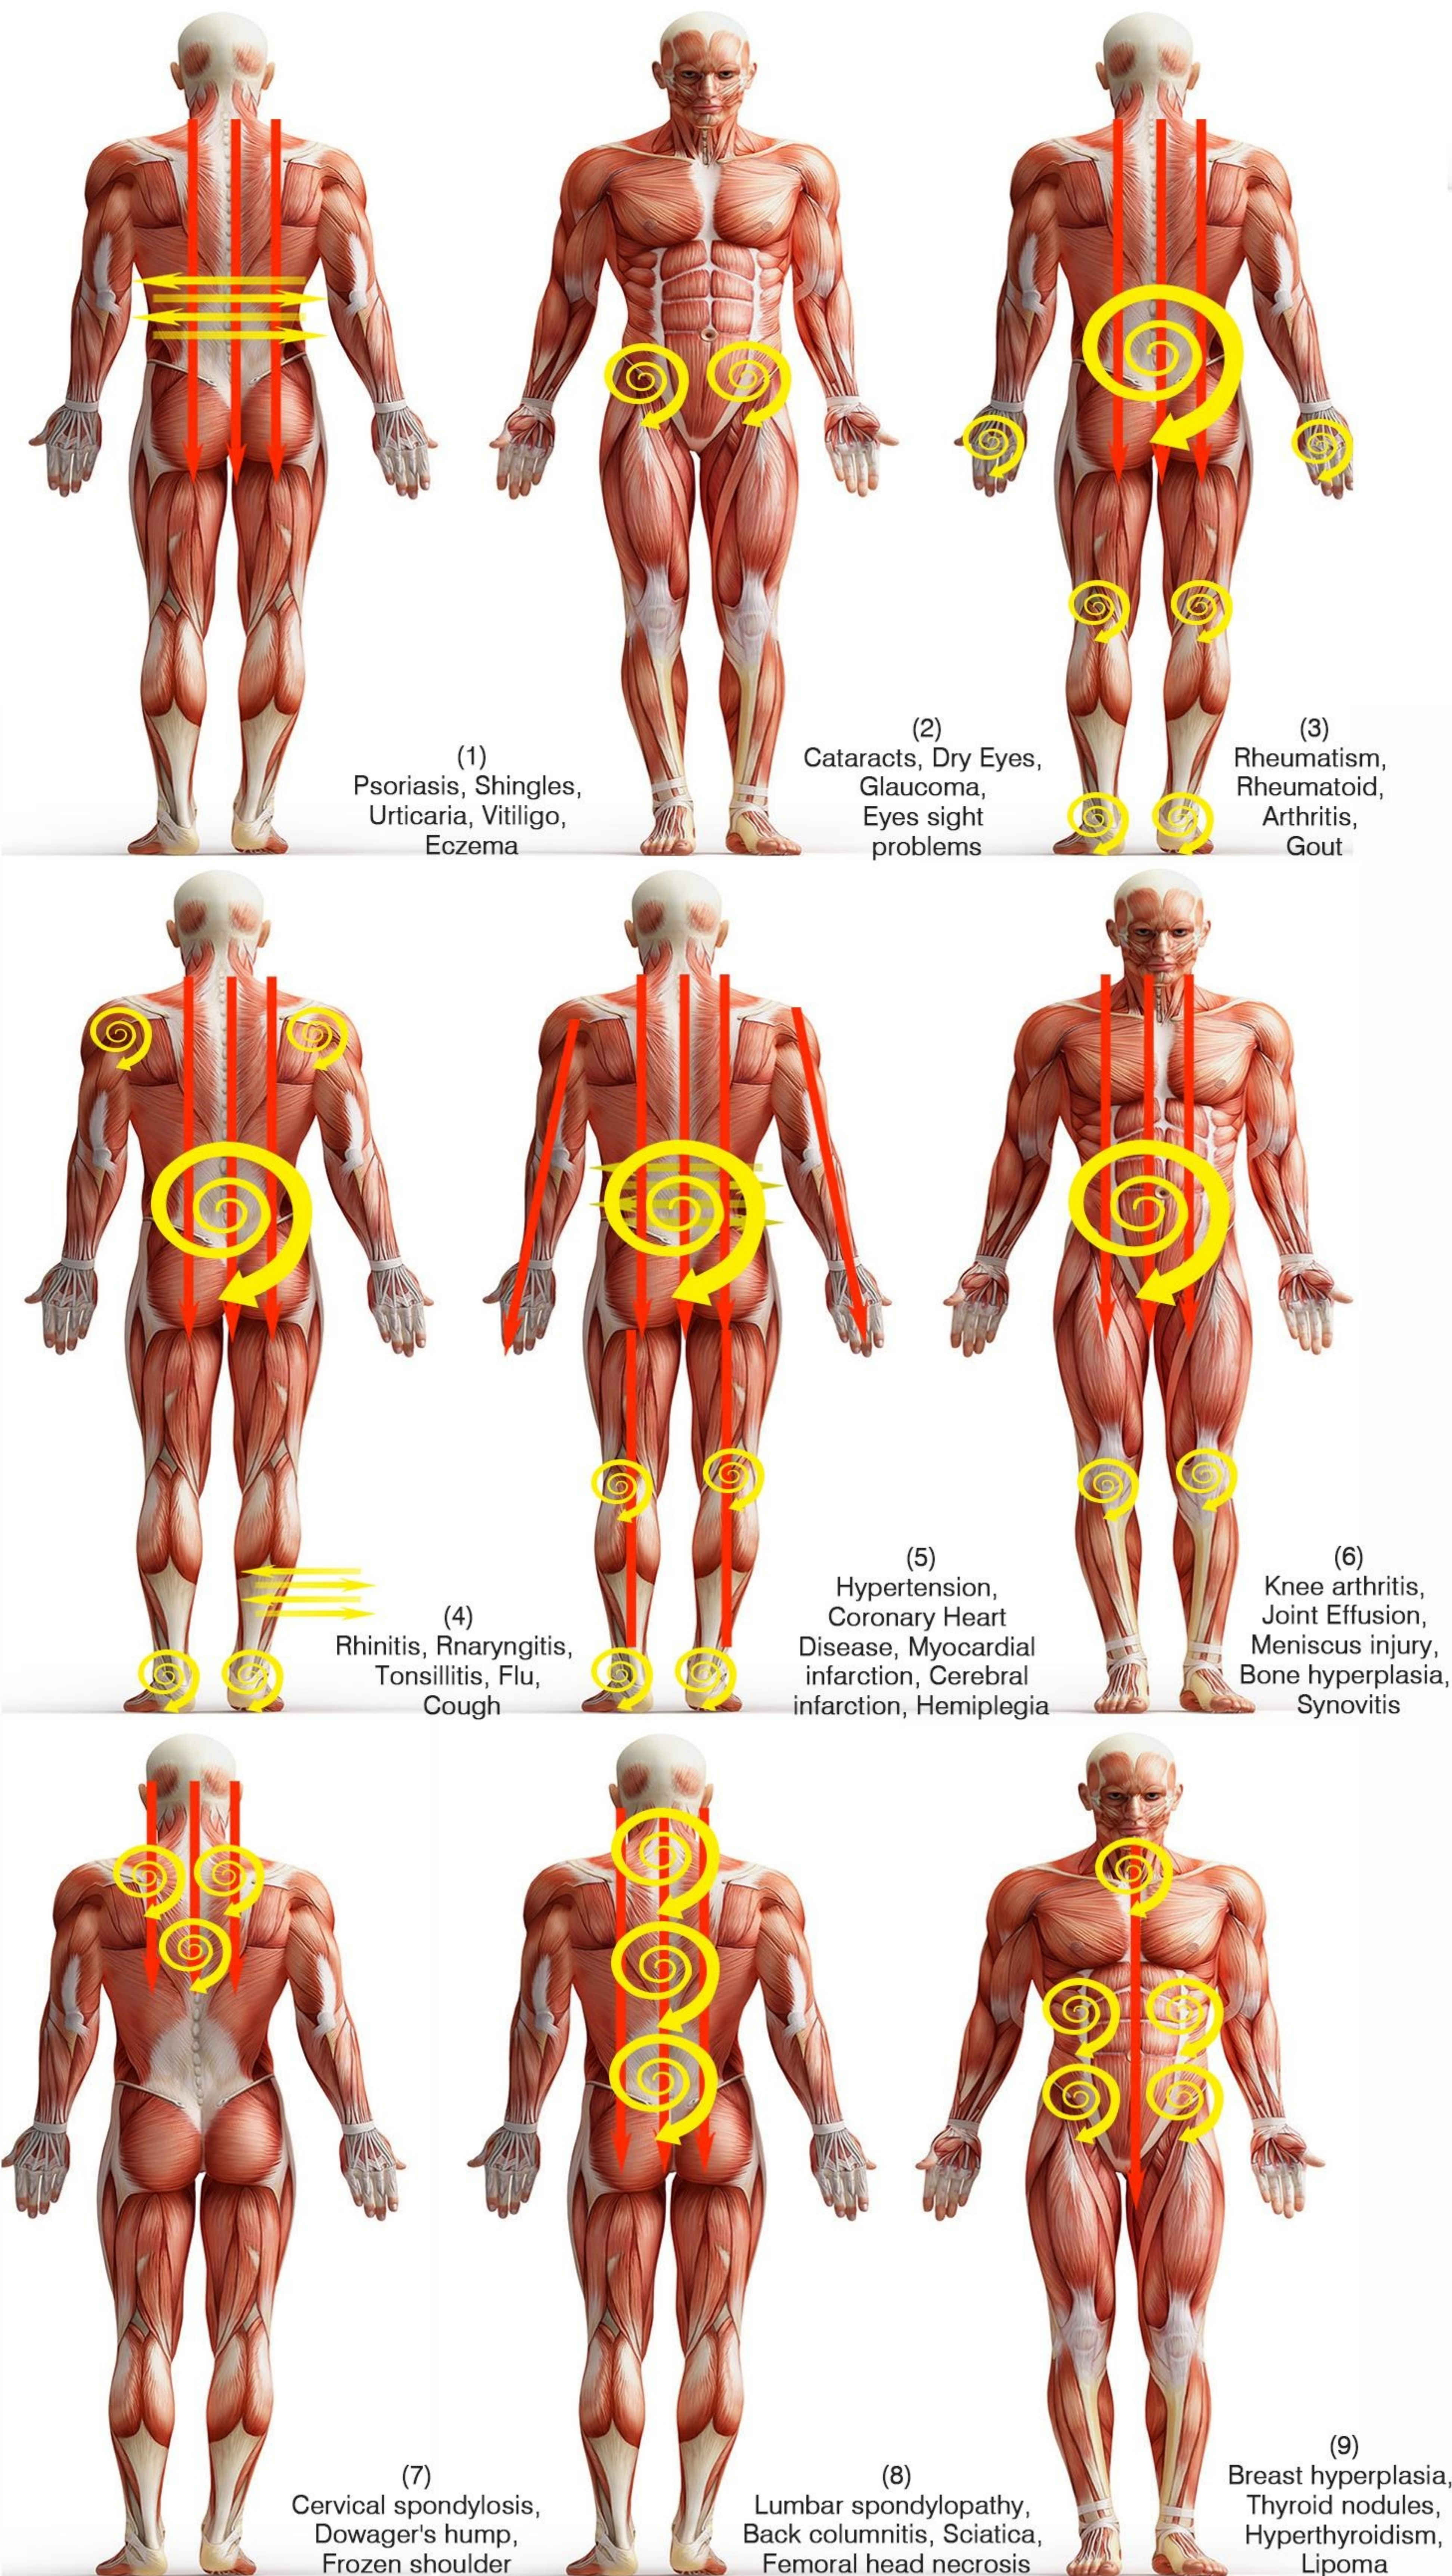

Through the irradiation of the cell hyperthermia instrument, it emits quantum blue light which has a warming effect on the body.

The skin can slowly dissipate water in the body and promote local blood circulation, to relieve pain and restore cell function, thereby curing rheumatism, joint pain, muscle and bone, pain and discomfort, etc.
